RD

Dear Residents,

To help maintain the shared plumbing systems and prevent costly backups and damage, we kindly remind all residents to only put water down the drains. Please do not dispose of grease, oil, fats, or food scraps in sinks or drains, as these substances can harden, clog pipes, and cause severe plumbing issues that affect the entire building.

What to Do Instead:

- ✔ Allow grease and oil to cool, then dispose of it in a sealed container in the trash.
- ✔ Wipe greasy pans with a paper towel before washing.
- ✔ Use sink strainers to catch food particles.

By following these simple steps, we can avoid unnecessary plumbing repairs and ensure a properly functioning drainage system for all residents.

Thank you for your cooperation!
